

Your partners – excellent solutions!

# About us

- Company was established in 1949 in Kranj, Slovenia, Europe
- > 5,10 Mio EURO turnover (2015), 68 employees, 15 R&D
- Machine Engineering company

automation electroindustry

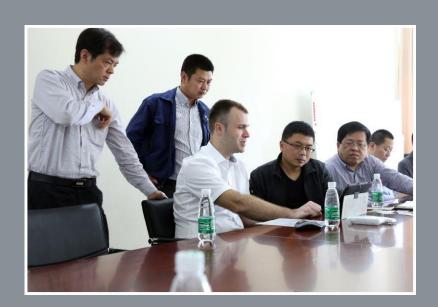

ISO 9001:2008 certified

# About us

What makes ISKRA's solutions so special?

- Extraordinary approach
- High professional development and certified top quality
- Iskra's services

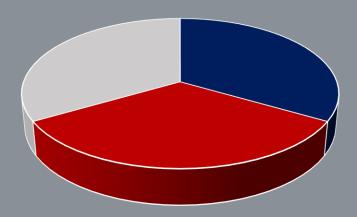

# Iskra Philosophie

#### **UTMOST TASK FULFILMENT**

#### **EVERTHING FROM ONE SOURCE**

**COMPLETE SOLUTIONS** 

# **Location**

Company is located in Kranj, Slovenia, Europe

### **Assembly lines....**

• Screwings, Insertings, Manipulations, ....

### **Assembly lines....**

• .... Robots, ....

### **Assembly lines....**

• .... special conveyors, ....

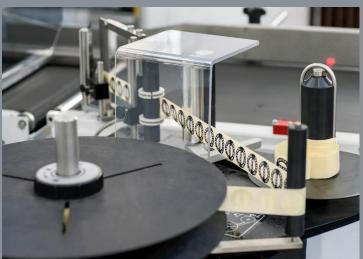

### **Assembly lines....**

• ....etc.

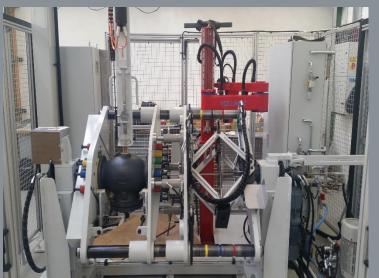

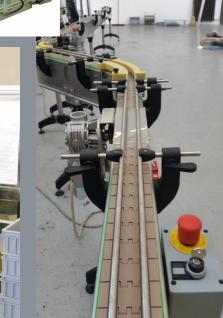

**Special Machines – Customer Design** 

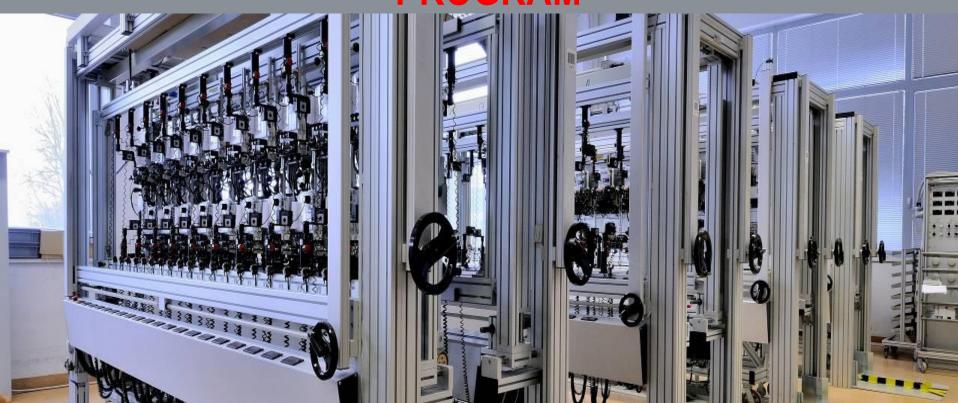

# MEASURING AND TESTING EQUIPMENT PROGRAM

- System for simultaneous testing up to 80 electric energy meters.
- Completely meets standard IEC60736 (Testing equipment for electrical energy meters).
- Enables measurement of meters in compliance with standards: IEC 62052-11, IEC 62053-21, IEC 62053-22 and IEC 62053-23.

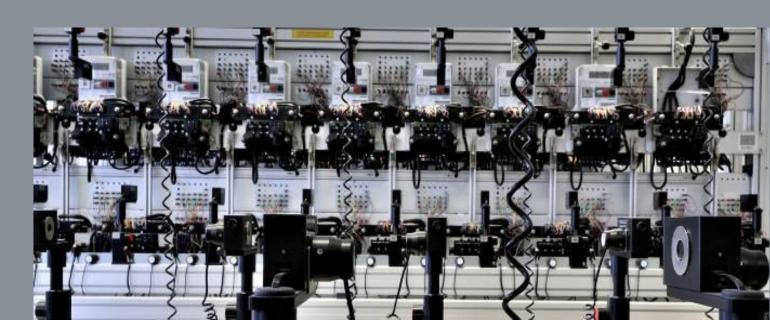

- Modularity step by step upgrade and modernisation of systems by elements.
- Enables testing meters of classes 0.2, 0.5, 1 and 2 or A, B and C classes according standards EN 50470-1, -2 and -3.
- Testing of meters with different constants.

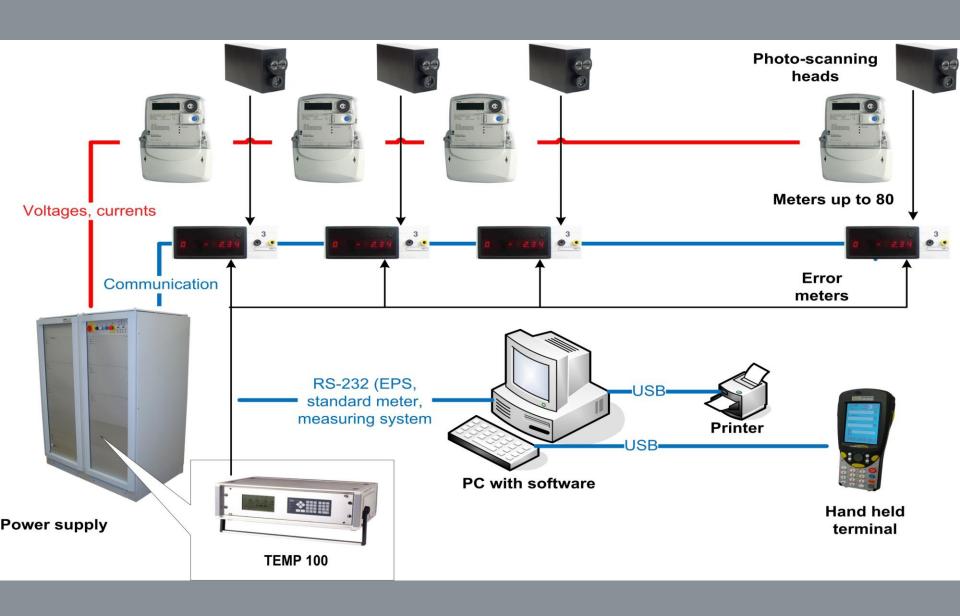

- Energy comparison method.
- Automatic or semi-automatic procedure implementation.
- PC controlled process.
- Support for special variant of meters.

- Power supply
- Reference standard meter
- Construction (racks, tunnels,...)
- PC and printer
- Variant equipment
- Software CATS

#### **Power sources**

- Voltage source 30-320 V L-N
- Current source 60, 120 A or 200 A
- Phase angle 0° up to 359,99°
- Harmonic generation
- Controlled over RS-232 or keyboard/display

#### **Reference standard meter TEMP-100**

- Accuracy 0.05% or 0.02%
- Measuring of P, Q, S, PF, f, Urms, Irms
- Single-phase and three-phase (two or threeelement) active or reactive
- TDM technique
- Controlled over RS-232 or keyboard/display
- Bench top casing variant

#### **Auxiliary devices**

- Error meter
- Photo-scanning head
- Quick acting connector
- Hand held terminal

#### **Auxiliary devices**

- Multi-Secondary Voltage Transformer (MSVT)
- Isolation Current Transformer (ICT)

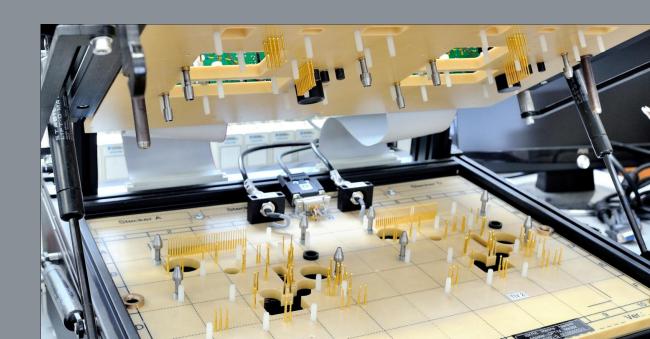

#### **Special devices**

- Starting and running with no-load device, Warm-up device
- HV tester
- Device for functional test of PCBs

- Fixed variants
- Tunnel variants
- Special variants
- Racks

- Fixed variants
- Tunnel variants
- Special variants
- Racks

- Fixed variants
- Tunnel variants
- Special variants
- Racks

- Fixed variants
- Tunnel variants
- Special variants
- Racks

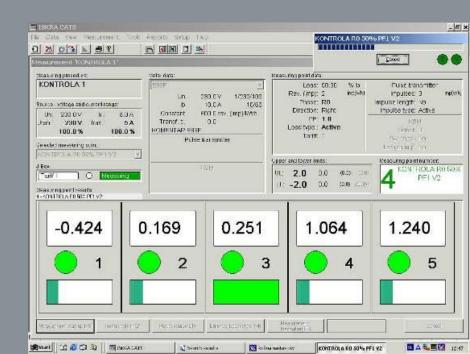

#### **Software**

- Control of source
- Control of Standard meter
- Display of current measuring values
- Prepare of test procedures
- Storing procedures and results in database
- Users authorisation

#### **Special Software**

- Development of special software for special measuring devices
- Integration of other measuring devices (standard meters, hand held terminals...)
- Integration our measuring devices in other systems
